

PLANETS

OCTOBER 19, 2018

Would you like to contribute YOUR expertise to online professional development for out-of-school time STEM educators like yourself?

Planetary Learning that Advances the Nexus of Engineering, Technology, and Science (PLANETS) is a NASA-funded collaboration between Museum of Science, Boston, the Center for Science Teaching & Learning at Northern Arizona University, and U.S. Geological Survey Astrogeology Science Center to develop and support three new out-of-school time engineering units focusing on planetary science.

Our professional development team is seeking enthusiastic and dedicated educators interested in contributing to the growing field of out-of-school time STEM education.

As a STEM Education partner you will:

- Explore and develop educator support materials for a planetary science and engineering curriculum for grades 6-8.
- Work with us to co-create relevant and useable educator support materials for this curriculum, providing valuable feedback before, during and after the working session.
- Grow as an out-of-school time educator through engagement with other diverse educators and new curriculum!

To receive the \$400 stipend, you must agree to:

- ✓ Review curriculum materials and complete feedback forms by October 8, 2018
- ✓ Attend the full session on October 19, 2018
- ✓ Agree to review or create products as follow up

Make a difference &
join our team to
develop high quality
STEM educator
support materials!

**Friday, October 19
8:30 AM - 3:30 PM
Includes lunch!**

TBD, Phoenix area

**Accepting
applications through
9/28. Only 15 seats
available – apply
now!**

\$400 stipend for full
participation

APPLY BY SEPT 28
